(54) Title: PEELABLE POLYETHYLENE FILMS

(57) Abstract: A homogeneous blend comprising from 10 % to 90 % by weight of a metallocene catalyzed polyethylene (mPE) and from 90 % to 10 % by weight of styrene-butadiene block copolymers comprising from 5% to 40% by weight of 1,3 butadiene monomer units and from 60% to 95 % by weight of styrene monomer units. The blend of the invention is used to make peelable films for food packaging applications.
